THE WORLD CLASS IMPACT WRENCHES MANUFACTURING COMPANY

COMPANY

Dino Paoli S.r.l. supplies all the teams participating in F1, F2, DTM, World Series by Renault, V8-Supercar, Indy Lights, IRL, Nascar, F. Nippon, and almost all racing teams in Endurance, GT, F.3000, IMSA.

Dino Paoli, the strength of a winning idea embodied in a company working in different sectors: motorsport, automotive, and industry.

A craft industry vocation and a long-standing tradition in the production of pneumatic impact wrenches and accessories have led the company to lead the Motorsport sector, making it the ideal partner for several teams, thanks to the high speed and reliability of its products.

Wheel guns to suit all the needs of those who believe in speed, making the pit stop a fundamental element in the outcome of a race.

Quality, technology, innovation and close collaboration with customers are just some of the features that have made Dino Paoli a successful name in the racing world.

HISTORY

THE ORIGINS

Dino Paoli S.r.l. was incorporated in 1968 and it has specialized in the production of wheel guns used in workshops for commercial vehicles and standard road cars.

1968

1975

F1 PODIUM

Thanks to the superior fastness and compactness of its products, Paoli becomes the official supplier for one of the most famous F1 teams.

1994

THE US MARKET

Dino Paoli S.r.l. enters for the first time the highly competitive US motorsport market.

2000

BRAND AWARENESS

Paoli becomes synonym of race wheel gun.

2011

FORMULA NASCAR

Dino Paoli S.r.l. gets into Nascar with Red Devil. This represents Paoli's debut in the one of the most important U.S. championships.

2012

TSA SYSTEM

Dino Paoli S.r.l. introduces an innovative technology which is able to monitor the torque and angle signal on the wheel nut.

2014

DP 5000 TI MARK II

Paoli starts manufacturing new wheel guns using aerospace materials. Titanium, carbon and magnesium alloy are now used to produce the model DP5000 TI MARK II.

2016

DP 6000

Dino Paoli S.r.l. produces the DP 6000. The use of high quality materials and the revolutionary 90° ergonomics handle make the latest Paoli wheel gun a technology gem.

2017

RED DEVIL 2.0

Designed for Nascar, the RED DEVIL 2.0 has been developed in order to give an extraordinary fastness and smoothness to the Nascar tire changers.

2018

NASCAR

Dino Paoli S.r.l., thanks to the development of new mechatronic technologies, becomes the sole pit equipment supplier of Nascar.

2019

From **PAOLI'S EXPERIENCE** and its cutting edge sectorial engineering research a new wheel gun is born: the **SPLINE DRIVE HURRICANE**. The work in R&D of the Paoli highly skilled technicians and the partnership with the most recognized racing teams has allowed the development of an innovative and greatly performing product.

A spline drive wheel gun differs from a square drive tool mainly in the teeth that connect the anvil with the socket.

Spline drive wheel guns, because of the increased contact points between the anvil and the socket, offer a better torque transmission and a reduced load on each contact point.

This means the following **ADVANTAGES**: more power; more strength; more endurance.

Paoli supplies spline sockets to be used with **HURRICANE SPLINE**.

JAN LARSEN ART

ARTIST: JAN LARSEN
BORN: 1967
NATIONALITY: USA
STYLE: NEO-POP

Talked about as one of the most interesting, thoughtful, entertaining, and important artists at work in contemporary art today, **Danish-American Neo-Pop celebrity artist Jan Larsen** credits his collectors, clients, patrons, mentors, and contemporaries with inspiring him to new heights in his work, as his career progresses seemingly into the art-historical firmament.

After starting his fine-art-and-production business **Jan Larsen Art** in the apartment he took over from Brian Donnelly (also known as **KAWS**, now one of the world's most-successful artists) in 2000 as a means of learning the fine art trade prior to joining it as an artist himself, Larsen built the enterprise and brought it to trade globally, founding and running **four contemporary art galleries** in New York City from 2000 to 2015, **producing hundreds of exhibitions**, and representing **over 50 artists and hundreds of clients**, on primary markets and at auction, with accounts at the **Christie's**, **Sotheby's**, and **Phillips** auction houses.

Having thoroughly researched the markets for fine art in terms of content and mechanics of the trade while reflecting on what he wanted to say with his work during those 15 years, Larsen finally **launched his career with a solo show in 2015** in partnership with a retail gallery in Manhattan's Chelsea neighborhood, and has mounted show after show since, 10 solo shows in the first 4 years, each well-received and selling well in New York, London, and Singapore.

From his **popular-culture-based reflections** to his abstract digital prints, his 'word-work' meditations, his Dada-esque conceptual sculptures and performances, to his abstract-expressionist paintings in the traditions of Jackson Pollock and Japan's Gutai Group, Larsen's powerful range demonstrates a mastery of **art-as-social-commentary** in a wide array of contexts and formats, commenting precisely, presciently, and powerfully on the times we live in.

Thanks to the work of the artist **Jan Larsen, Paoli Hurricane** becomes an art masterpiece.

Dedicated to the high-octane world of motorsport's elite races, **HIGH TEST** is a limited edition contemporary sculpture.

Precious and suggestive, **HIGH TEST** is inspired by Paoli wheel guns, by Pit Stop world and by the value that good teamwork holds for everyone, not only on the pitlane.

BEST PRACTICE PIT STOP

Generated from **PAOLI'S EXPERIENCE** in the sector and cutting edge engineering solutions, is the first electric cordless gun for pit stop application: the **E-GUN**.

The latest creation of Paoli's highly skilled R&D technicians is an innovative and highly performing product never seen before.

This is the first electric wheel gun with performances equivalent to those of a pneumatic wheel gun like the DP4000 MG and, unlike any other cordless on the market, equipped with a set of electronic components designed specifically for motorsport.

Fully metal built, E-GUN is equipped with the patented three griffes hammer mechanism, and with the ergonomic handle evolved together with the teams on the pit lane.

The E-GUN is completed by a data logging system and a control which allows the user to modify a large variety of settings.

PAOLI SOCKETS

The new Paoli wheel nut sockets

PAOLI SOCKETS

S

WHEEL NUT SOCKETS

The new Paoli sockets are an unprecedented product and the result of a long and complex engineering research. Continued consultation with many race customers has ensured that the Paoli Sockets' technological development goes hand in hand with the real needs of racing teams in terms of versatility, safety, materials and maintenance.

- Three different materials: titanium, special steel and aeronautical aluminium. The first and the second are suitable for the race application, the third one is suitable for non-intensive use and torque wrench.
- Innovative design, attractive shapes and aesthetically pleasing.
- Accuracy in fitting the socket to the square drive, perfect clearance that allows the socket to be assembled and disassembled just by hand.
- Innovative safety system to insert the pin through the socket/square drive hole. Revolutionary system when assembling the socket by using the circlip and an 'O' ring on the cover. Maximum safety, a fine fitting and a considerably reduced assembly time.
- Insertion of service holes for maintenance of magnets: replacing magnets is quick and easy, with a simple plug-locator.
- Internal 'O' ring retaining nut made from new Paoli Sockets material. The customized resin gives the socket an ideal grip with its high gripping power.
- The Paoli Sockets Service Kit for the maintenance and replacement of worn parts contains everything needed to work on the socket simply and safely. A brief instruction manual indicates the optimum way to carry out operations (E.g. replacement and subsequent refinement of magnets).

Internal 'O' ring retaining nut especially made for Paoli Sockets.

Also available in aeronautical aluminium, suitable for torque wrench applications.

Innovative safety system.

Replacing magnets is quick and easy thanks to rear service holes.

Accuracy in fitting the socket to the wrench (minimal clearance).

Innovative design, attractive shapes and aesthetically pleasing.

SPLINE SOCKETS SERVICE KIT

CODE: B.23.0221
Spline anvil-socket connection kit.

The kit includes:

- 1 adjustable hook wrench with round pin
- 3 disc springs
- 3 self-locking washers
- 1 axial retaining screw

INSERT ADAPTERS

Recommended just for garage use.
With this compact insert adapter to a bigger square drive the overall length is reduced to an absolute minimum.
The insert adapter sticks to the socket by means of a magnet.

FAST REVERSE DEVICES

Speed up your wheel gun shuttle motion

E-SHUTTLE

R

MOTORSPORT APPLICATIONS

The E-Shuttle is the latest wheel gun equipment which enhance the traditional manual spool position swap to a fully automatic motion. The combination of electronic power and software control guarantees higher accuracy and repeatability allowing changes in less than 15 hundredths of a second. The operator can now command the spool position with a conventional switch that, conveniently located, can reduce effort and time of actuation.

The entire system is controlled by an electronic circuit housed in the back cover which logs and shares many analog and digital signal via CANBUS communication protocol; and it is powered with a 12 volts, 2 ampères supply.

The E-Shuttle system logs and controls several parameters:

- SOCKET ROTATION ANGLE RPM
- TELEMETRY PRESSURE
- E-SHUTTLE TELEMETRIC DATA
- SPOOL POSITION

Product code: B.23.0220

HIGHLIGHTS

- ✓ Ease of actuation
- ✓ 0.15s spool change
- ✓ Repeatability

- Telemetry pressure sensor and hose
- Angle sensor Kit
- Spool switch and cable

CLUTCH DEVICE

B.23.0166 LH VERSION

B.23.0167 RH VERSION

It reduces the power on tightening. The clutch device consists of:

- ① Anvil shank
- ② Clutch plate with angled jaws
- ③ Cam clutch
- ④ Ball
- ⑤ Clutch housing

By replacing this parts you get a gun that is less powerful on tightening while the loosening power remains unchanged.

CARBON PEEK MOTOR VANES

B.23.0131

MORE DURABLE. After a test run at 30 bar, we got a double life when compared to the normal carbon vanes.

MORE SMOOTHNESS. The carbon peek composite gets much less friction in the air motor.

Available for wheel guns DP 4000 BIAS, DP 4000, DP 3000, DP 2000 S, DP 2000 SE.

CARBON FRONT COVERS

Now with Zylon film built-in and Paoli logo. The Zylon coating prevents the splintering of the carbon cover increasing the operator safety. Screws and washers included.

PAOLI REGULATORS

S

AIR PRESSURE REGULATORS

Main features: Paoli regulators have all been conceived to first guarantee the correct (very high) air flow to all the models of Paoli guns. Furthermore, all the Paoli regulators minimize the pressure drop from static to dynamic. We do deliver mostly piston regulators for high pressure and diaphragm regulators for lower pressures.

- All of our regs are entirely made of brass
- We can deliver different kind of gauges (standard, filled w/vaseline to stabilize the needle, w/double main scale psi/bar)
- We do always recommend to match a high pressure oiler to each regulator and to ship them back regularly to us or to an authorized service centre for a complete overhaul.

F4 FEATURES

- The “Paoli F4” air pressure regulator is the best seller model. It keeps high performances also when the bottle is almost empty. Max air flow superior to any other air pressure regulator!
- It grants constant air flow also at high pressures.
- It keeps high performances also when the air bottle is half empty.
- It gives very high air flow

AIR PRESSURE REGULATOR SERVICE FIXTURE

S.01.0161

The air pressure regulator service fixture sustains the regulator during its assembling and disassembling phases. It is compatible with the following Paoli air pressure regulator models: F1, F2, F4, F9 and F50.

AIR PRESSURE REGULATOR TESTING BENCH

B.23.0171

This kit has been designed to test the air pressure regulators. The air pressure regulator testing bench is composed by:

- 1 bench (350 x 130 x 80 mm)
- 1 hose
- 1 valve

DIN 200 Bar coupling for compressor available on demand (Code: B.21.0088)

SPARE GUN AIR SUPPLY DEVICE

NEW DESIGN

B.42.0073

This device allows the operator to get a second spare gun connected to the same air supply. It is needed in case of EMERGENCY (first gun failing) during the pit stop operations.

WARNING: you should use just on gun at a time otherwise the air flow drops down very quickly.

Couplings not included.

SPARE GUN AIR SUPPLY DEVICE

Electronic pressure switch mountable on all Paoli pressure regulators.

The acoustic alarm, audible at a distance, alerts the user when the cylinder is emptying. This limits the risk of running out of air and reduces the possibility of compromising the wheel gun performance in case of semi-empty air bottles.

FEATURES

- Easily readable digital display
- Intuitive and fast setup
- Settable Pressure
- Easy and flexible mounting
- Acoustic alarm
- Power adapter included

CODE	B.40.0090
CONNECTION	1/4" BSP
RANGE	0-400 bar

DIGITAL GAUGES

BACKLIGHTING:
the display can be easily read, even under poor lighting conditions.

ROTATABILITY OF THE DISPLAY:
The display can be rotated through 300°, thus it can be read from almost any position. Therefore the gauge can also be used in situations where mounting is difficult.

PRECISE AND QUICK READING OF THE DISPLAY

The robust stainless steel case and the battery power enable a flexible operation of the digital gauge. For a precise and quick on-site reading of a pressure value, a digital indicator is the ideal solution. The bargraph display and drag pointer function integrated into the display, as well as retrievable Min/Max peak values, enable effective analysis of the measuring point.

Thanks to the rotatable display, the digital pressure gauge can be easily adapted to difficult conditions. The backlighting also provides easy readability of the display in poor lighting conditions.

FEATURES

- Battery operation (2 x 1.5 V AA cell)
- Min/Max memory function
- Unit switching: bar, psi, MPa
- Accuracy 0.5 % ± 1 digit

DOUBLE TROLLEY KIT

Extra-strong micropallinated stainless steel chassis

Double connection bottles for easy filling

High pressure hose to connect the air bottle to the air pressure regulator.

C.01.0011

The kit includes:

- No. 1 double trolley
- No. 2 18 litres bottles with double connection
- No. 2 air bottle trolley kit
- No. 1 F4 air pressure regulator (DIN air bottle connector included)

Also available with 2 F4 air pressure regulators (code C.01.0013).

The air pressure regulator is protected by a roll-bar

Wheel gun holder

Hose holder

Large diameter wheels to overcome obstacles

It can be converted in single trolley

SINGLE TROLLEY KIT

to overcome obstacles

C.01.0010

The kit includes:

- No. 1 single trolley
- No. 1 18 litres bottle with double connection
- No. 1 air bottle trolley kit
- No. 1 F4 air pressure regulator
(DIN air bottle connector included)

MINI TROLLEY KIT

C.01.0028

The kit includes:

- No. 1 single trolley
- No. 1 9 litres bottle with double connection
- No. 1 air bottle trolley kit
- No. 1 F4 air pressure regulator (DIN air bottle connector included)

AIR JACK TROLLEY KIT

Extra-strong steel chassis

Wheel gun holder

Double connection bottle
for easy filling

A metal bar protects the new position
of the air pressure regulator.

Hose holder

Large diameter wheels
to overcome obstacles

An assembly containing fewer connections between the air bottle and the air pressure regulator, making its final price more competitive while maintaining a high level of safety and quality.

The utilization of the trolley is possible both vertically and horizontally.

C.01.0019

The kit includes:

- No. 1 single trolley
- No. 1 15 litres bottle with double connection
- No. 1 F1 air pressure regulator
(DIN air bottle connector included)

TRACK DAYS TROLLEY KIT

Simplified steel chassis

A metal bar protects the new position of the air pressure regulator.

Double connection bottle for easy filling

Hose holder

Large diameter wheels to overcome obstacles

The simplified steel chassis and the fewer connections between the air bottle and the air pressure regulator make the final price more competitive while maintaining a high level of safety and quality.

The utilization of the trolley is possible both vertically and horizontally.

C.01.0021

The kit includes:

- No. 1 single trolley
- No. 1 15 litres bottle with double connection
- No. 1 F1 air pressure regulator (DIN air bottle connector included)

NIPPLE FOR AIR BOTTLE

B.21.0089
Nipples 1/4" bsp female - 7/16" unf male

This is the nipple to adapt the air pressure regulators connectors to be connected to the air bottle through the high pressure hose coming from the high pressure compressor.

AIR BOTTLE VALVES

B.22.04.0001

B.22.04.0000

The air bottle valve is available with single or double connection.
It can be fitted with the connection placed upon the air bottle collar M25x2.

AIR BOTTLE HOSE

B.21.0034

High pressure hose connection (220 bar) between air bottle and air pressure regulator.
Equipped with paintball, connector and valve.
Other dimensions available on demand.

HIGH PRESSURE AIR BOTTLE COMPRESSORS

Automatic pressure regulator

Pressure switch for automatic stop

Compressor hours-counter

Gauge, tap and non-return valve

Standard compressor configuration with:

- automatic condensate drain with timer
- double pressure: 225 and 330 bar
- pressure switch for automatic stop
- non-return valve

Optionals available on request for DPH220 and DPH460 models:

- hours-counter (code B.21.0202)
- trolley (code B.21.0203)
- automatic pressure regulator (code B.21.0204)

HIGH PRESSURE LIFTING BAGS / FLAT SHAPED

FLAT LIFTING BAGS

High-pressure flat lifting bags are used for lifting the heaviest loads.

They exert maximum force in a concentrated area, making them ideal when lifting rigid structures in tight places. Flat lifting bags have a flat working surface: they start out flat and remain flat even when fully inflated.

- Flat surface
- Greater contact surface and stability
- High lift and high capacity
- Strong manipulation handles
- Cone-shaped protection edges
- Unique anti-slip surface
- EN 13731 Certified
- Extremely Durable
- Thin Design

Caseliner Pitlane Equipment

MAGSEAM SEAMLESS WALLING

MAGSEAM seamless wallings is a special seamless surface panels system using unique technology of magnetic attachment. The main advantages of this system are: elegant design which will attract all the attention to your team, variability and time-saving assembly, overall stability of the system due to patented elements which are holding each panel, possibility of full-area printing or colour on demand. Magseam system is supplied on demand with special flight case box for each project.

Complete projects including the custom tv monitors, helmet dryers and other elements are on demand.

GANTRIES

GANTRIES are modular truss structure elements with solid conical connectors. Extremely fast connection for quick, simple and secure assembly. They are used as support for lighting, screens and cables, interior and exterior applications. Caseliner gantries are available in three versions Bi-System (duo), Tri-System (trio) and Quattro-System with certified 50mm tube. Build with us your project.

RACEFLOOR

RACEFLOOR has been developed for all your racing flooring needs. The tiles are easy and quick to install due to an ingenious click lock system, you can combine any colour of tiles with each other. Racefloor is very flexible and strength and it can be used on any flat base, both indoors and outdoors. It is very proof, durable and UV stable flooring with a very good resistance to chemical pollution.

Code B.39.09.0004: Racefloor 1 mq - 1000x1000 mm

Code B.48.0013: Flight Case

POWERHOODS

POWERHOODS are made for lighting in the race boxes, lighting over the race car, motorbike or in the workshops. These light pods are suspended above a vehicle and act as a life support machine supplying the following outputs with zero effect on valuable floor space. POWERHOOD provides high luminosity together with a practical and elegant design. It is possible to be equipped with air distribution and power plugs following customer request and specifications.

Code B.39.11.0001: Powerhood S200-32 (400V/32A)

Code B.39.11.0002: Powerhood S200-16 (230V/16A)

PRODUCT CARE

Service and overhaul

PAOLI SERVICE

C

PRODUCT CARE

To ensure the reliability, accuracy, power and speed of our product, we recommend a complete overhaul. Our After Sale Service can provide information about after how many cycles (No. 1 cycle = No. 1 LOOSENING + No. 1 TIGHTENING) the service is required.

You can also require the repainting of the tool to get it back to the aesthetic (and functional) conditions similar to a new wheel gun. The service Test carries out laboratory testing on individual components subject to greater effort. It is possible also to convert the directionality (for each wheel gun model), transforming it to its different versions (UH, RH, LH).

- **S - SERVICE AND REPAIR:**
the wheel gun is fully overhauled, cleaned, all consumable components replaced and finally tested
- **R - SERVICE, REPAIR AND REPAINT:**
in addition to the service S, the wheel gun is repainted
- **T - SERVICE, REPAIR, AND TEST REPAINT:**
in addition to service R, the wheel gun is subjected to various tests that certify the conformity of the components
- **C - SERVICE, REPAIR, REPAINT AND CONVERSION:**
in addition to service R, the wheel gun is transformed to its different versions (UH, RH, LH).

The table on the following page details all transactions carried out for each type of service.

WHEEL GUNS SERVICE PROCEDURE

	(S) SERVICE REPAIR	(R) SERVICE REPAIR REPAINT	(T) TEST	(C) SERVICE REPAIR REPAINT CONVERSION
CHECK Check of the table "Request for Service & Maintenance" that is filled in to the customer.	✓	✓		✓

THREE-LAYER REAR GASKETS

OPTIONAL RUBBER COATED ALUMINUM GASKET

Three-layer gasket designed to guarantee a longer life and a better seal compared to traditional gaskets.

- reusable
- more use cycles
- excellent mechanical performance
- give the consideration of both aluminum rigidity and rubber elasticity for its special construction.

D.01.17.0111	HURRICANE
D.01.17.0112	DP 6000, DP 6000 BIAS, DP 5000 BIAS, DP 5000 TI MARK II, DP 4000 30BAR

SERVICE TOOLS

CODE	AVAILABLE FOR
B.23.0159	DP 6000, DP 5000 TI MARK II, DP 4000 MG, DP 2000 SE

For the single codes of the tools please refer to the repair manual of the specific model.

MONOLITHIC PIN

- High resistance
- high performance in terms of rotation speed and precision point on work on the cam
- easily controllable status of life simply by measuring the diameter from the starting point and day by day comparing the gun performance respect the diameter decrease.
- built in titanium

PAOLI SERVICE

PRODUCT CARE

Since 1968 we have been manufacturing wheel guns, and we would now like to get our professionalism and experience available to our customers to an even greater extent.

We have heavily invested in research and development in order to get procedures and instruments suitable for the study and creation of products most suited to the growing needs of the automotive industry.

Dino Paoli is in fact now able to offer to customers an Engineering service which consists in the development of variations of wheel guns components customized according to different needs.

The engineering offer covers several areas: performances, durability, ergonomics, lightness.

To obtain these results we use and work on materials from the aviation and military industry, such as special steels, carbon fibre, aluminium and magnesium alloy, titanium.

The design of the new components is tested using finite element analysis (FEM) and once designed (CAD) these are produced using CAM, which allows us to easily obtain even geometrically complex parts.

Lately we have introduced the CFD air flow analysis to further optimize our wheel guns performances.

We also have a range of suppliers very skilled in heat treatments, who are capable to accurately identify the expected mechanical features.

FAQ

Your questions. Our answers

- **Why do we have LH, RH, UH wheel guns?**
RH and LH give more power on the loosening mode (where it is mostly required), UH delivers the same power on both directions.
- **What is the difference between a 70/30 wheel gun and a 60/40 wheel gun?**
70/30 means that 70% of the power is on the loosening mode; 60/40 means that 60% of the power is on loosening mode.
- **Which feature have I to keep in mind to chose a hose in order to get the best performance?**
The most important feature is the inner diameter of the hose in order to guarantee the correct air flow to the gun.
- **What is the difference between a 2-port and a 3-port back cover?**
The ports are the holes in the shuttle (they can be 2 or 3). This definition refers to the shuttle motion. The 2-port is normally for right handed operators, the 3-port is normally for the left-handed operators.
- **What BIAS means and what is its purpose?**
BIAS means that the gun is both RH and LH and you can convert it from one version to the other just moving a lever on top of the gun.
- **What is the difference between static and dynamic pressure?**
The static pressure is the pressure you read on the OUT gauge of the regulator when the gun is not working; on the other hand, the dynamic pressure is the pressure you read on the OUT gauge of the regulator when the gun is working (the dynamic pressure is always lower than the static pressure).
- **Why would I need a Fast Shuttle on my wheel gun?**
To be faster at changing the gun direction (from loosening mode to tightening mode just pushing a lever with the thumb or just slightly moving the wrist on the Fast Shuttle 2.0 release.
- **What is the fluorescent magnetoscopic inspection?**
The method, designed for the inspection of small parts, consists of a component immersion in a detecting fluid. Through the magnetization the fluorescent particles are attracted and finally a UV lamp reveals defects and non-compliances.

AUTOMOTIVE PRODUCTS

Not for racing applications (lower pressure - 6,3 bar)

AUTOMOTIVE IMPACT WRENCHES

(LOWER PRESSURE - 6,3 BAR)

AUTOMOTIVE IMPACT WRENCHES

Discover a small selection of our automotive impact wrenches for garage applications.

Paoli automotive products are designed for optimal garage use.

Our automotive impact wrenches are designed to be lightweight and easy to handle with an optimum weight/power ratio.

Technical features, working pressure and constructive materials are not suitable for racing applications.

You can find all the Paoli automotive products on our website www.paoli.net.

ATTENTION: NOT FOR RACING APPLICATIONS

The company does not suggest the use of these products at a working pressure of over 6.3 bar.
