B-G Racing

MOTORSPORT EQUIPMENT

9TH EDITION

INTRODUCTION

Brown and Geeson Ltd was established in 1963, and continues to be involved in the design and development of a wide variety of products, which include OEM, performance and motorsport equipment.

Our B-G Racing Motorsport Equipment is designed and created with the know-how that can only come from years of competing, with hands on experience trackside and in the workshop.

All B-G Racing equipment gives you an unbeatable combination of labour-saving design, durability, high quality manufacture, practicality and exceptional value.

Utilising the latest Solidworks CAD software to remain at the forefront of product design and Brown & Geeson have a programme of continual investment in our factory to ensure the products are manufactured in the most efficient way.

The company and its employees are dedicated to providing customers with products of superior quality, combined with excellence in all aspects of customer service.

With years of experience working with customers on a global basis we can offer delivery solutions to the majority of the world through our air, sea and road freight partners.

QUALITY

Quality is at the heart of Brown and Geeson Ltd's philosophy for business success. Following this philosophy, Brown and Geeson Ltd holds BS EN ISO 9001:2015 accreditation. We are proud to be certified and registered as complying with the ISO for over 15 years as credited by TÜV UK.

WHAT DOES ISO STANDARD MEAN?

The ISO standard means that we as a company have proven our reliability to provide quality products that meet customer requirements. It also covers company efficiency and organisation along with our ability to achieve an enhanced level of customer satisfaction.

All products are inspected at our headquarters in Essex before delivery is made to our customer's import facilities or parts distribution centres.

Our company also reinforces its health, safety and environmental policy with on-going education and training to ensure its products and services are delivered in a manner that safeguards employees, customers, the public and environment from unacceptable risks.

SERVICES

REPAIRS, SERVICING AND CALIBRATION

Brown and Geeson Ltd are always looking at ways to improve our customer service. We offer a user friendly calibration service for all of our race scales and control units to ensure they are maintained and provide accurate readings at all times. We also host a full range of spare components should any of the parts sustain damage from time to time.

Please call **+44 (0) 1268 764411** or email **sales@bg-racing.co.uk** for more information.

TECHNICAL HELPLINE

If you have any questions or would like expert advice on any of our products, please call **+44 (0) 1268 764411** or email **sales@bg-racing.co.uk.**

CAN'T FIND WHAT YOU ARE LOOKING FOR IN OUR CATALOGUE?

Why not check out our website **www.bg-racing.co.uk** for all of the latest product information, alternatively you can give us a call or email **sales@bg-racing.co.uk** with the details, one of our experienced and knowledgeable staff members will be happy to discuss your requirements. Brown and Geeson Ltd are open to new product ideas and expansion of our product ranges.

STAINLESS STEEL WHEEL AND TYRE TROLLEY

Chariot à pneus en acier inoxydable
Reifenwagen edelstahl
Carrello pneumatici acciaio inox
Carro para el transporte de ruedas

CUSTOM SIZES AVAILABLE UPON REQUEST

An extremely high quality and versatile Wheel and Tyre Trolley featuring adjustable internal beam widths of 400mm, 475mm and 550mm to cater for various diameter wheels and tyres. Available in either 1300mm, 1500mm, 1600mm or 1800mm demountable tyre friendly round cross beam lengths.

Two fixed and two fully-rotating locking and braking aluminium castor wheels are supplied as standard to give strength, stability and easy manoeuvrability around the pits, paddock and workshop.

Manufactured from high quality 304 grade stainless steel with a superb hand-polished mirror finish.

Supplied with an A-frame with M12 rod end for connecting to a paddock vehicle (maximum towing speed of 5mph/8kph).

POWDER COATED WHEEL AND TYRE TROLLEY

Chariot à pneus en acier
Reifenwagen pulverbeschichtet
Carrello pneumatici
Carro para el transporte de ruedas

Convenience and quality come together in the design and manufacture of this sturdy Powder Coated Wheel and Tyre Trolley, equally practical for transport in the pit and paddock, or for storage back at the workshop.

Demountable tyre friendly round cross beams reduce the marking of tyres and are available in 1300mm, 1500mm or 1600mm internal lengths. The height of the top beams can also be adjusted in 3 positions depending on the diameter of your tyres and to reduce the overall trolley height when in use.

Two fixed and two fully-rotating locking and braking castor wheels are designed for strength and ease of movement around the pits, paddock and workshop.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

Two optional A-Frames fitted with an M12 Rod End and a Rear Towing Frame are available separately (maximum towing speed of 5mph/8kph). It is recommended that Aluminium Wheels (BGR113P / BGR114P / BGR124P) are used for towing.

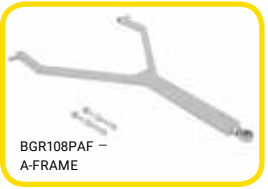
FOLDING WHEEL AND TYRE TROLLEY

Chariot à pneus en pliable
Klappbarer Reifenwagen
Carrello pieghevoli porta pneumatici
Carro plegable para el transporte de ruedas

ITEMS SHOWN ON TROLLEY NOT INCLUDED



BGR108PAF – A-FRAME

BGR108PRT – REAR TOWING FRAME

Fully assembled, the trolley can carry multiple wheels and tyres on the tyre-friendly round cross beams as well as tools, parts and other accessories in the bottom tray. The tray has also been specifically designed to accommodate stackable Euro Bins allowing users to maximise the storage space available.

When not in use, simply remove the beams and secure them in the empty tray before folding flat each end frame and locking them shut. The trolley can then be slid in to any suitable space for storage and transportation.

Two fixed and two fully-rotating locking & braking castor wheels are provided for strength and ease of movement around the pits, paddock and workshop.

An optional A-Frame fitted with an M12 Rod End, and a Rear Towing Frame are available separately (Maximum towing speed of 5mph/8kph). It is recommended that Aluminium Wheels (BGR108PAL) are used for towing.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

SINGLE TIER WHEEL AND TYRE TROLLEY

Chariot à pneus
Reifenwagen mit 1 Ebene
Carrello Porta Gomme Compatto
Carros para neumáticos

Equally practical for transport in the pit and paddock, or for storage back at the workshop, this Single Tier Wheel and Tyre Trolley is supplied with a pair of 1300mm demountable tyre friendly round cross beams to reduce the marking of tyres, and a central top beam for added strength.

Two fixed and two fully-rotating locking & braking polypropylene castor wheels are supplied as standard, but these can be upgraded to aluminium wheels for towing, or two fully-rotating and two fully-rotating locking & braking polypropylene castor wheels for workshop use.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

An optional A-Frame fitted with an M12 Rod End and a Rear Towing Frame are available separately (maximum towing speed of 5mph/8kph). It is recommended that Aluminium Wheels (BGR191P) are used for towing.

Wheel Dividers protect the rim faces by preventing them from rubbing against each other (BGR193).

FOLDING UTILITY WORK STATION

Servante atelier pliante
Klappbarer Papierrollenständer
Stazione multifunzione pieghevoli
Estación de trabajo plegable

REGISTERED DESIGN

ITEMS SHOWN ON WORK STATION NOT INCLUDED

The Folding Utility Work Station is a must have product for all workshops as it has multi-functional capabilities. The work station includes a tray on the top to hold a small selection of tools, a recessed section for bottles and aerosol cans, a paper roll holder, a waste bin bag holder and an area for a 400mm x 300mm Euro Bin to be fitted where you can store other consumables.

The work station is fitted with 75mm diameter wheels which allow ease of movement around the garage or workshop.

The folding design makes transportation of the work station easy and keeps storage space to a minimum.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

Nylon Bin Facade, Euro Bin and Paper Towel Rolls available separately.

FOLDING PAPER TOWEL ROLL DISPENSER

Support pour papier de nettoyage pliante
Papierrollenständer
Porta rotolo di carta pieghevoli
Soporte rollo papel plegable

The B-G Racing Paper Towel Roll Dispenser is designed to accommodate both our large and small Blue Paper Towel Rolls and features a serrated blade to provide a clean, straight cut.

Its size and weight makes it easily manoeuvrable, perfect for use at home in the workshop or garage. When not in use it simply folds flat for ease of storage and transportation.

Suitable for paper towel rolls with a minimum core diameter of 17mm and a maximum width of 400mm.

LARGE FOLDING TABLE

Table pliante Grand
Klapptisch Groß
Tavolo pieghevoli Grande
Mesa plegable Grande

ITEMS SHOWN ON TABLE NOT INCLUDED

The ideal companion trackside or at home in the workshop, the Large Folding Table features a sturdy 1.8m work surface and folds in half for ease of storage and transportation.

Shelves can be purchased separately along with specifically designed Kart Tyre Rails which can be positioned in several different arrangements to suit the user's requirements and to increase the available storage and working space.

Weight-rated levelling feet on the bottom of each leg make it quick and easy to achieve a level working surface.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

WHEEL & TYRE CLEANING BATH

Machine à laver des roues et pneu
Reifenwaschtisch
Serbatoio pulizia per il ruote e pneumatici
Baño de limpieza de ruedas y neumáticos

The Wheel and Tyre Cleaning Bath is the perfect solution for reducing mess and controlling waste, whilst bringing wheel and tyre cleaning up to a comfortable working level.

The framework is manufactured from high-grade mild steel with a durable black finish, the Wheel and Tyre Cleaning Bath features adjustable width stainless steel rollers to suit different wheel or tyre diameters. The bath can also be used for washing rims only. A stainless steel drain with a filter element is fitted in the bottom of the bath. The wastewater can either be held in the bath or drained through the supplied hose into a nearby drain or container, depending on the circuit requirements.

The bath can be quickly detached from the frame by releasing detent pins and the legs fold flat for ease of storage and transportation.

A 400mm x 300mm Euro Bin can be fitted on the supports between the legs for storing your cleaning equipment and consumables.

FOLDING PADDOCK TABLE

Table pliante
Klappbarer Arbeitstisch
Tavolo pieghevoli
Mesa plegable para boxes

ITEMS SHOWN ON TABLE NOT INCLUDED

Knowing what life is like in the pits, paddock and back in the workshop, we know how useful it is to have everything to hand, that's why we designed the B-G Racing Folding Paddock Table.

Nearly 1m in width and 0.5m deep, it's large enough to hold a selection of tools and equipment, and the raised table edges will keep them securely on the top surface.

The quick and easy folding design allows for easy transportation and storage. Enhanced feature enables a 400mm x 300mm Euro Bin to be fitted for additional storage.

Manufactured from high-grade mild steel with a durable silver grey powder coated finish.

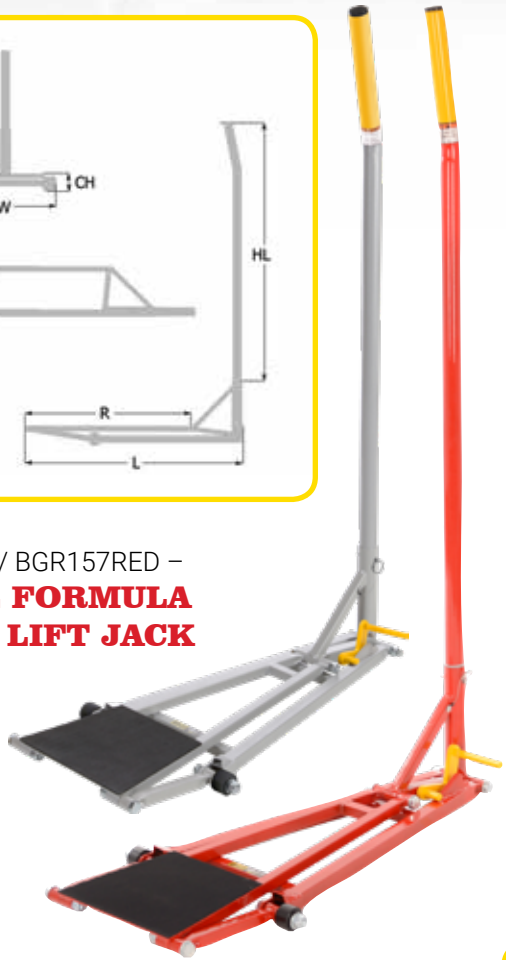
BGR157P / BGR157RED –
SMALL FORMULA QUICK LIFT JACK



Engineered and manufactured with durability and ease of use in mind, B-G Racing Quick Lift Jacks are suitable for a wide range of vehicles, including formula, saloon and rally.

All feature a very low closed height and are designed to locate beneath the differential and front or rear chassis members, raising the car to a fixed height in one swift movement. A safety locking device which is quick and easy to use ensures the handle cannot be raised unless intended.

Produced from high-grade mild steel with a durable silver grey or red powder coated finish for longevity. Design detail includes an extra long, ergonomic handle for excellent leverage with a yellow tip to enhance visibility and nylon roller wheels to allow easy manoeuvrability.

VEHICLE RAMPS

Rampes de levage
Auffahrrampen
Rampe auto
Rampas de coche

The B-G Racing Vehicle Ramps are available in either Low Rise or Mid Rise versions, perfect for various applications.

The Low Rise Vehicle Ramps are a great solution to a problem commonly faced by many race teams, mechanics and vehicle owners. They are ideal for use on lowered vehicles and race cars as the gentle gradient elevates the car an additional 70mm off the ground allowing for easier and safer access for trolley jacks.

Providing 110mm of lift, the Mid Rise Vehicle Ramps are great for quick under-body maintenance tasks and provide enough clearance for trolley jacks to safely access the underside of the vehicle. The gentle gradient makes them suitable for use on most lowered vehicles, sports cars, rally cars and race cars.

The Vehicle Ramps are produced from a durable black Polypropylene (PP) and have a combined weight loading capacity of 5000kg.

TYRE CHANGING RAMP

Rampe changement de roue
Auffahrbock für Reifenwechsel
Rampa di sollevamento
Rampas para Cambio
de Neumáticos

Save time and energy when replacing flat or punctured tyres.

Designed for use on twin axle trailers, the Tyre Changing Ramp simplifies the wheel changing process. Simply loosen the wheel nuts/bolts on the damaged wheel and drive the good wheel onto the Tyre Changing Ramp. The damaged wheel is then suspended off the ground allowing for work to be carried out safely and efficiently, before driving the trailer back off the ramp and re-tightening the nuts/bolts.

No more messing around with jacks or makeshift shims, one of these Tyre Changing Ramps can be easily stored in the back of the trailer and quickly used in the event of experiencing a puncture in the future.

Sold individually.

STANDARD ALUMINIUM PIT BOARD AND NUMBERS

Panneautage
Boxentafel
Tabella Box
Pizarra Tiempos

A pit board is a must have in almost all forms of motorsport. B-G Racing Pit Boards have been created to fulfill the requirements of race teams by offering a choice of two different size boards which can be purchased separately or as part of a complete kit with Carry Bag and Number Set.

The Standard Pit Board is manufactured from lightweight T6 Aluminium with four colour options; red, blue, black or bright silver. All finishes are durable and hard wearing for longevity.

An optional Name Plate is the ideal solution for those who struggle to pick out their pit board amongst the crowd. Produced from 3mm thick foam PVC, it is perfect for personalising with a driver's name, number or logo and creates a professional appearance.

Simply pushes into the B-G Racing Standard Aluminium Pit Board.

The Standard Pit Board Kits include a full set of Hi-Vis Numbers and a protective Carry Bag that features internal pockets to keep the Number Set organised.

The 38 piece number set for the Standard Aluminium Pit Board includes numbers, letters, word and symbols. Available in a choice of Hi-Vis Green, Hi-Vis Orange, Hi-Vis Pink, White or Hi-Vis Yellow colours.

A unique feature is that each number, letter, words and symbol features a smaller icon in the top left hand corner to make it easily identifiable when stored in the bag pockets.

The bag is produced from Nylon fabric and features flaps to ensure the numbers do not fall out during transportation and a pair of removable and adjustable straps to make it easier to secure the bag to a pit wall.

The number sets and the bag can also be purchased separately.

MECHANICS WORK MATS

Matelas pour mécano
Mechanik Matte
Tappetino da meccanico per ginocchia
Esterilla mecánico

The B-G Racing Mechanics Work Mats provide a stable and comfortable platform perfect for working in the garage or pit lane. With 3 different options in the range, allowing users to either sit, kneel or lay comfortably when working on the vehicle. The perfect companion for those everyday tasks.

All mats are produced from a high quality 30mm thick heavy-duty EVA composition which is water and impact resistant and feature an integrated carry handle.

BGR400 Mechanics 3 in 1 Folding Work Mat features a 6-fold collapsible construction that can be manipulated to suit the user's requirements.

BGR401 Mechanics Kneeling Work Mat is small and compact, yet ideal for those quick tasks.

BGR402 Mechanics Work Mat is the largest in the range giving a greater surface area to lie on.

3” CLUBMAN RACE SCALES

Balance Clubman 3”
3” Clubman Radlastwaagen
3” Kit Bilancia Clubman
Balanzas de Carrera 3”

An accurate scale system incorporating all of the features required for a team or driver to carry out a professional chassis set up. The Clubman Race Scales connect to the control pad using heavy-duty flexible cables.

The easy to use control pad displays the vehicle’s four corner weights, the cross weights and percentages all at once which can be stored within the 20 slot internal memory. It also has the ability to calculate the vehicle’s centre of gravity and the option to change the displays and configurations of the readings and features a low power consumption level with a rechargeable battery life of 40 hours.

A protective carry case is included to protect and transport the control pad, cables and mains power adaptor.

3” WIRELESS RACE SCALES

Balance Wireless 3”
3” Wireless Radlastwaagen
3” Kit Bilancia Wireless
Balanzas de Carrera 3”

The B-G Racing Wireless Race Scale pads are produced from aluminium with a ribbed construction for maximum strength and almost zero deflection. The wireless technology eliminates having cables all over the floor of your workshop and allows you to move around your race car with the wireless control pad in your hands.

The easy to use wireless control pad displays the vehicle’s four corner weights, the axle weight, the cross weights and percentages all at once. The control pad display and configuration can be changed to suit the user’s preference and features a low power consumption level.

A mains power adaptor is included for the control pad (with UK and EU plugs) in the event of replacement batteries not being immediately available. A protective carry case is included to protect and transport the control pad.

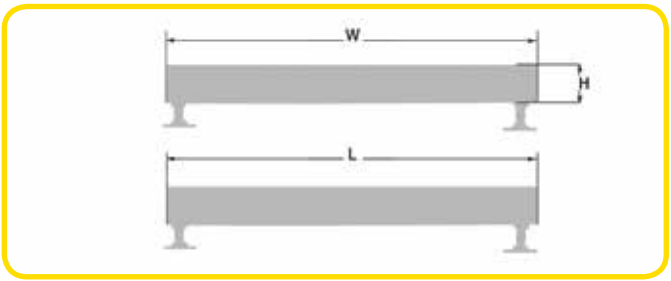
MODULAR SCALE PAD LEVELLING TRAYS

Plateaux de réglages pour balances
Nivellier-Untersetzer
Livellatore piatti
Plataforma de nivelación



A key component of the B-G Racing modular scale system, these Scale Pad Levelling Trays are produced from mild steel with a powder coated finish and feature four high quality steel swivel feet with 75mm of adjustment to ensure complete accuracy. The feet can also be removed for ease of storage and transportation.

Suitable for use with 2.5" to 3" scale pads and designed for the B-G Racing Modular Roll Off Platforms to attach to.

The Scale Pad Levelling Trays are sold as a set of four.

The B-G Racing Levelling Foot Extension Kit has been designed for those uneven paddock floors where additional height is needed for one of the Levelling Trays. Offering 35mm of lift per foot, they can be used individually or joined together for increased height.

HUB STANDS

Designed, developed and precision manufactured in the UK to the highest quality from 6061 T6 aluminium, the B-G Racing Hub Stands kit is the ultimate solution for vehicle set up and alignment.

This advanced and proven system replaces the vehicle wheel and tyre set, giving access directly to the hubs to carry out a complete suspension and alignment set up without needing to lift the vehicle, and eliminating the need to roll the vehicle on and off the scale pads to unload the suspension after adjustments. The changes occur in real time!

With B-G Racing Hub Stands, set up is faster and more precise than using a wheel and tyre set, with repeatable accurate measurements instead of the ever-changing figures caused by wheel and tyre variations.

Each base features a pair of high load, low resistance roller bearing wheels which allow the Hub Stands to respond with the vehicle suspension as changes are made. This keeps the suspension bind-free, which in turn makes the adjustment process quick and easy, showing the results of changes instantly.

The B-G Racing Hub Stands are height adjustable in 2mm increments to suit different tyre diameters and can be supplied with a variety of multi-drilled hub plates to suit different vehicle bolt patterns. The interchangeable plates are available in a wide range of configurations, including a selection of centre lock wheel hubs and any custom application.

Each set of Hub Stands includes a set of four aluminium Toe Sticks, precisely CNC machined in order to be bolted parallel to the hub face for stringing, or at the bottom of the Hub Stands base for measuring total toe. The Hub Stands are supplied with a set of eight 105mm Toe Stub Extensions designed to offset the Toe Stick away from the face of the hub to clear large brake calipers and grease caps. A set of four Stainless Steel Safety Plates are also included in the kit which are used to prevent the vehicle from rolling off the scale pads.

The B-G Racing Hub Stands are suitable for vehicles up to a weight of 2000kg (4400lb).

BESPOKE FITMENTS AVAILABLE UPON REQUEST

CENTRE LOCKING WHEEL NUT COLLARS

Designed to allow cars with hubs utilising single centre locking wheel nuts to be used with Hub Stands. The collars are CNC machined in the UK from 6061 T6 aluminium and they are tailor made to match each wheel nut to ensure the Hub Stand centralises to provide repeatable measurements.

Bespoke fitments are available, please contact us to request a specification form.

The kits generally consist of four to eight collars depending upon vehicle specific details.

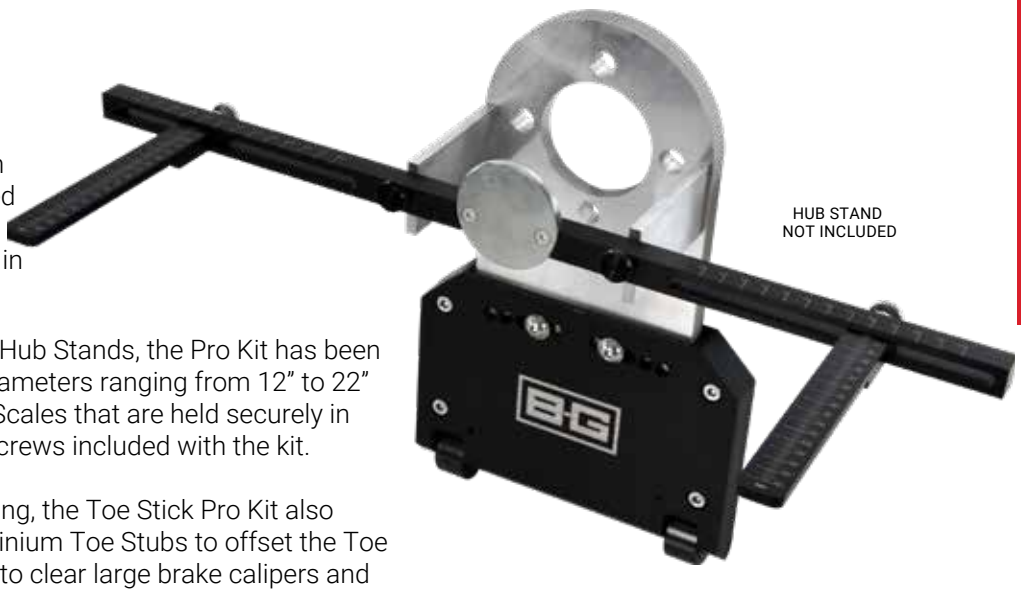
HUB STANDS TOE STICK PRO

Hub Stands - Barres Alignement
Hub Stands - Spurmessgerät
Hub Stands - barre di misurazione angoli di convergenza
Hub Stands - Pro Sistema De Alineación

The Hub Stands Toe Stick Pro Kit is a revamped version of the existing Toe Stick and Toe Stub set up which features a pair of sliding, laser-etched measurement scales that make reading the values quick and simple in conjunction with the String Lines.



HUB STAND
NOT INCLUDED

Designed for use on the B-G Racing Hub Stands, the Pro Kit has been manufactured to work with wheel diameters ranging from 12" to 22" thanks to the sliding Measurement Scales that are held securely in place with a pair of knurled thumb screws included with the kit.

Finished with a black anodised coating, the Toe Stick Pro Kit also includes a set of eight 105mm aluminium Toe Stubs to offset the Toe Stick away from the face of the hub to clear large brake calipers and grease caps and Steel Plates which mount in the centre line of the hub for use with our range of magnetic camber measurement equipment.

DIGITAL DUAL AXIS ANGLE GAUGE

Niveau digital de carrossage et bulle de chasse
Digitales Sturz – und Nachlaufmessgerät
Indicatore digitale caster/camber con custodia
Nivel digital

The compact gauge can be used to measure absolute and relative angles to 0.1° accuracy in 0.02° increments in both single and dual axis modes.

Featuring a large back lit LCD screen, hold button to freeze display, a programmable audio buzzer, auto power off and V shaped multiple magnetic sides for easy mounting.

Low power consumption with a rechargeable battery life of 40 hours. USB and mains charger included in kit.

A Hub Stands Mounting Kit (BGR305) is available separately to easily mount the unit and measure camber angles. The Mounting Kit is machined from billet aluminium with a durable bright silver anodised finish.

BILLET DIGITAL CAMBER / CASTOR GAUGE

Niveau à bulle pour carrossage, pivot et chasse avec adapteur magnetique

Sturz- und Nachlaufmessgerät mit Magnetadapter

Livella caster/camber con constodia e attacco magnetico

Medidor de camber con adaptador

Precision CNC machined billet alloy frame, the B-G Racing Digital Camber / Castor Gauge utilises the B-G Racing Digital Dual Axis Angle Gauge to accurately measure camber and castor to 0.1° repeatable accuracy, clearly displayed on the large 0.02° resolution backlit LCD screen. Suitable for either left or right handed users, with auto power-off and rechargeable lithium-ion battery giving up to 40 hours operation.

Additionally, the B-G Racing Digital Dual Axis Angle Gauge can be removed and used separately as a digital angle finder for suspension, strut, pinion, spoiler angles and many other applications.

Complete with protective carry case and magnetic adaptor for quick and easy hub mounting.

ALUMINIUM CAMBER FRAME WITH DIGITAL DUAL AXIS ANGLE GAUGE

Équerre pour mesurer le carrossage avec le niveau digital
Alurahmen mit Digitales Sturzlaufmessgerät
Livella camber e caster
Medidor de camber digital con adaptador para llantas

The Aluminium Camber Frame is produced with a durable black powder coated finish and is supplied with the Digital Dual Axis Angle Gauge (BGR304) offering quick and simple camber measurement for left or right handed users on vehicles with wheel diameters up to 20".

The Digital Dual Axis Angle Gauge reads camber and castor from -90 to +90 degrees and is removable for standalone use.

The Aluminium Camber Frame can also be purchased separately without the Digital Dual Axis Angle Gauge (BGR307FR).

A protective carry bag is available to keep the Aluminium Camber Frame and Digital Dual Axis Angle Gauge protected during storage and transportation (BGR307BAG).

The 3 Pin Adaptor (BGR309) is available for additional wheel rim support.

ALUMINIUM MAGNETIC TOE MEASURING PLATES

Instrument de mesure de l'alignement
Spur Mess- und Einstellgerät
Strumento di Allineamento Delle Ruote
Alineado de ruedas tablero

Measuring toe is quick and simple with the B-G Racing Aluminium Toe Plates. Simply rest one of these high-strength, lightweight plates flat against the tyre on each side of the vehicle and use the 5 metre magnetic tapes provided to accurately measure the toe.

Kicked-out bottoms hold the plates flat against the wheels, whilst the tapes feature strong magnetic ends which attract to the slots to securely hold them in place whilst working.

Produced from aluminium with a durable black powder coated finish.

A protective carry bag is available separately to keep the Toe Measuring Plates and Magnetic Tapes protected during storage and transportation (BGR308BAG).

LASER LEVELLING KIT

Kit Niveau Laser
Radlastwaagen-Niveliergerat
Livella laser
Kit de nivelación láser

The most effective way to accurately level scale pads in levelling trays, roll-back trays or drive-on set up platforms to ensure your corner weight readings are accurate and consistent.

The kit consists of four CNC precision machined aluminium targets for placing on each scale pad and a 360 degree rotating laser unit with three adjustable levelling feet.

Supplied in a protective carry case with two AAA batteries.

TURN PLATES

Plateaux tournants
Drehplatten
Piatto meccanico rotante
Platos Giratorios

Constructed from lightweight aluminium, these Turn Plates are ideal for measuring castor, camber and kingpin inclination angles and can be placed directly on top of scale pads.

The Turn Plates feature ball bearings to enable free floating movement and ensure they do not bind, allowing for 25 degrees of rotation.

The laser etched dial can be zeroed when a vehicle is on the Turn Plates.

Sold as a set of two.

EZ SWEEP CASTOR SLIP PLATES

EZ Sweep Plaques réglage
EZ Sweep Drehplatten
EZ Sweep piatto meccanico rotante
EZ Sweep Platos Oscilantes

Ultra-thin EZ Sweep Castor Slip Plates allow you to drive your vehicle straight on, eliminating the need for any ramps or vehicle lifting.

With 20 degrees of rotation, they are ideal for measuring castor, camber and kingpin inclination angles.

This product has been engineered with a PTFE coated surface enabling it to slip, eliminating the necessity of grease and bearings.

Robustly constructed with a stainless steel base, this allows for these Slip Plates to be placed on the floor or directly on top of scale pads.

Sold as a set of two.

STRING LINES

B-G String Lines are the easiest and most accurate way to achieve four wheel alignment. The frames are fully adjustable to allow fitment to a wide range of cars and attaches to the vehicle using the hooking feet which are interchangeable with all of the tubes in the kit.

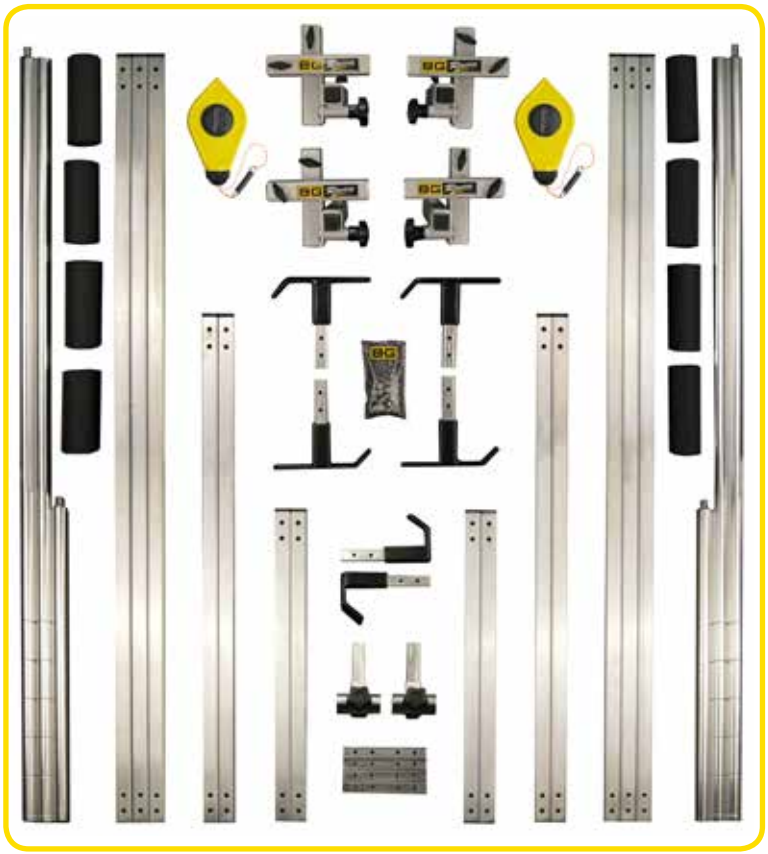
The string bars have a number of pre-machined grooves for the strings to locate in and a pair of extension bars making the B-G String Lines suitable for cars of different widths.

The B-G String Lines kit consists of front and rear multi-adjustable boss units manufactured from high-grade mild steel with a durable silver grey powder coated finish, hooking feet manufactured from high-grade mild steel with a polyurethane coating, silver zinc plated various length tubes, string bars machined from aluminium with a bright silver anodised coating and plastic String Line Reels (BGR201), which are also available separately.

The kit can be used in conjunction with Hub Stands, Clubman Race Scales and Scale Pad Levelling Trays to achieve the ultimate vehicle set up.

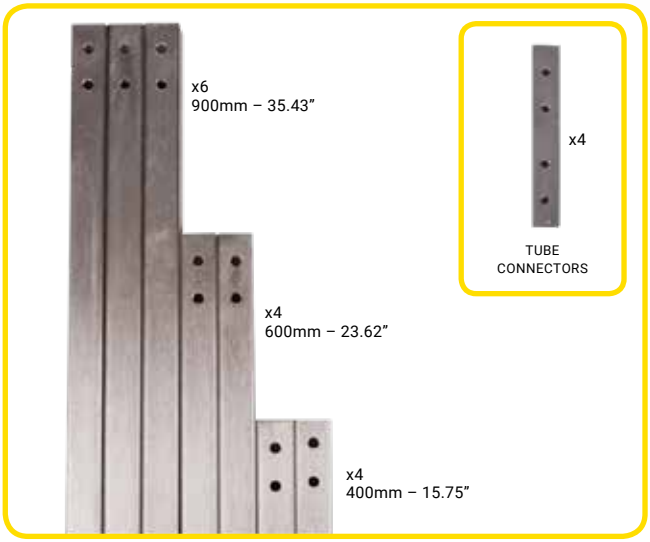
A black nylon Carry Bag (BGR200BAG) is available separately to store and transport the complete kit with ease.

BGR200BAG - CARRY BAG

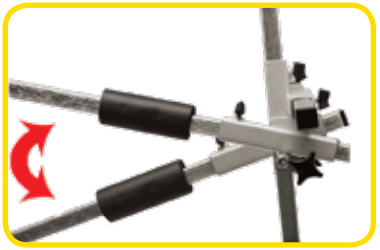


T: +44 (0) 1268 764411
E: sales@bg-racing.co.uk
W: www.bg-racing.co.uk

The tubes come in three different lengths and can be joined using the four tube connectors provided.



Four powder coated boss units that are fully adjustable to give options to suit various vehicles and applications.



TECHNICAL SPECIFICATIONS

NETT WEIGHT	16.10kg – 35.49lb	1.20kg – 2.65lb	140g – 0.31lb

Three types of feet that fit easily to all three length tubes. One type is double sided to give additional options when attaching the frames to the vehicles.

Four aluminium stringing bars and two extension bars with an anodised finish. The stringing bars feature machined grooves that the string lines locate into to ensure accurate positioning.

String line reels make the stringing process simple and also offer a neat storage solution to keep the string clean and tidy when not in use.

INFRARED THERMOMETER GUN

Pyromètre infrarouge
Infrarot Laser Temperaturmessgerät
Termometro a infrarossi con puntatore laser
Pyrometro laser

The Infrared Thermometer Gun is both compact and lightweight featuring a laser sight, Celsius/Fahrenheit selection and adjustable emissivity, it's a fast and highly accurate pyrometer giving instant non-contact surface temperature readings from -50°C to 800°C (-58 to 1472°F).

The Infrared Thermometer Gun displays minimum, maximum and average temperatures on the backlit display in 0.1 degree increments ideal for measuring engine, track, radiator temperatures etc. Multiple mode functions including 'Temperate Difference', 'High Temperature Alarm', 'Low Temperature Alarm' and 'Data Storage' for recording up to 12 surface temperatures with instant recall facility.

A built in low battery indicator and auto power-off help preserve the 9V battery included with the pyrometer, and a rubber coating on the plastic body aids grip and usability whilst offering a comfortable feel in the hand.

Infrared pyrometers are versatile tools that can be used to measure just about any kind of surface temperature, whether locating dead engine cylinders, negative heat sources within the cockpit or measuring track, brake and tyre temperatures.

Supplied in a hard shell, foam lined carry case for protection during storage and transportation.

STEERING WHEEL QUICK RELEASES

Quick system
Lenkradschnellverschluss
Mozzo a sgancio rapido
Extractor de volante

The B-G Quick Release systems allow for quick and easy removal of the steering wheel from the column, making it much easier to get in and out of any car.

The Bolt-On ball bearing systems feature a safety release button and are multi-drilled to suit 6x70mm & 6x74mm PCD steering wheels and hubs (BG4921) or 6x101 & 9x101.6mm PCD hubs (BG4924).
The Bolt-On 6x70mm PCD (BGR706) and Weld-On variants (BGR700 – BGR705) feature a master spline positioned dead centre which allows the use of the steering wheel as a reference point, ensuring perfect alignment every time.

20mm length steel splined shafts are available in a choice of 5/8" (16mm), 3/4" (19mm) and 1" (25.4mm) diameters that will require welding to the steering column.

B-G Hub Kits are produced in Italy from the finest cast aluminium materials and are dual drilled to be compatible with various steering wheels featuring either a 6 x 70mm PCD pattern (such as MOMO, Sparco, OMP, Simoni, Mountney M-Range, Italvolanti) or 6 x 74mm PCD pattern (such as Nardi, Personal, Raid). All B-G Hub Kits are supplied with fixing screws, allen key, and horn button retaining ring. Over 800 vehicle applications available.

WIDE ANGLE REAR VIEW MIRRORS

Rétroviseur intérieur
Weitwinkel Innenspiegel
Specchio restrovisore
Espejo Gran angular

These universal mirrors are perfect for the track. Featuring a convex glass to provide a wide field of view, they give you the best view of what's behind you.

Simply fasten the mirror to your roll cage using the bolt on brackets for a secure fitment that will not vibrate loose. All brackets are slotted to provide a wide range of adjustment and are secured to the mirror using wing knobs that allow for simple adjustment by hand.

Available in either 15" or 17" mirror lengths with brackets to suit 1.5", 1.7", 1.75" or 2" diameter roll cage bars. 1.5" and 1.7" options are supplied with a set of Rubber Packers (BGR754) that fit inside the 1.75" brackets to reduce the diameter.

Individual components can be purchased separately or as part of a complete kit.
