R PRODUCTION PROCESSES & SUITABILITY CONSTRUCTION VARIANTS & USES

FLOW FORM - ULTRALIGHT Flowforming tecnologia costruttiva leggera. Il materiale del grezzo del cerchio fuso è formato e fortemente compattato. Parti del cerchio in lega leggera vengono così prodotte con uno spessore di parete inferiore e la massima resistenza.

FORGED - ULTRALIGHT Tecnologia di costruzione leggera forgiata. Il processo tecnicamente sofisticato e complesso permette di ottenere spessori di parete più bassi con una resistenza estremamente elevata e un peso ridotto del cerchio. La durata, la minore sensibilità ai graffi e la migliore riparabilità di un cerchio forgiato giustificano il prezzo di acquisto più alto.

RACING WHEELS Cerchi in lega specifiche per la competizione anche in combinazione con pneumatici da gara.

OFFROAD - VAN WHEELS Cerchi in lega concepiti per veicoli fuoristrada e commerciali particolarmente pesanti. Disponibile con attacco a 5 e/o 6 fori.

WINTER FIT * Ideale anche per l'utilizzo invernale del prodotto.

RDKS READY Ruote in lega compatibili con sensori di pressione.

FLOW FORM - ULTRALIGHT Flowforming Leichtbautechnologie. Das Material des gegossenen Felgenrohrlings wird umgeformt und dabei stark verdichtet. Teile der Leichtmetallfelge werden so in geringerer Wandstärke bei gleichzeitig höchster Festigkeit hergestellt.

FORGED - ULTRALIGHT Geschmiedete Leichtbautechnologie. Das technisch anspruchsvolle und aufwändige Verfahren gestattet geringere Wandstärken bei extrem hoher Festigkeit und ein reduziertes Felgengewicht. Den höheren Anschaffungspreis rechtfertigen Haltbarkeit, geringere Kratzeranfälligkeit und bessere Reparierbarkeit einer Schmiedefelge.

RACING WHEELS Rennsporterprobte Felgenkonstruktionen auch in Verwendung mit Slicks.

OFFROAD - VAN WHEELS Hochstabile Felgenkonstruktionen mit höchstmöglicher Tragfähigkeit für schwere Offroad, Transporter und Vans mit 5 und/oder 6 Loch Anbindung.

WINTER FIT * Wintergeeignete Produktausführung.

RDKS READY Felgenmodelle mit Reifendrucksensoren kompatibel.

FLOW FORM - ULTRALIGHT Flowforming technologie de construction légère. Le matériau de l'ébauche de jante coulée est formé et fortement compacté. Les pièces de la jante en alliage léger sont ainsi fabriquées avec une épaisseur de paroi plus faible et une résistance maximale.

FORGED - ULTRALIGHT Technologie de construction légère forgée. Le procédé techniquement sophistiqué et complexe permet d'obtenir des épaisseurs de paroi plus faibles avec une résistance extrêmement élevée et un poids de jante réduit. La longévité, la faible sensibilité aux rayures et une meilleure réparabilité d'une jante forgée justifient le prix d'achat plus élevé.

RACING WHEELS Jantes pour la compétition aussi en combinaison avec pneumatique de course.

OFFROAD - VAN WHEELS Jantes pour les 4x4 les tout-terrain et les véhicules commerciales. Disponible avec raccord à 5 et/ou 6 trous.

WINTER FIT * Utilisation approprié même pendant l'hiver.

RDKS READY Jantes en alliage compatibles avec valves capteurs de pression.

per modificare il sistema di fissaggio da viti a dadi e viceversa con il sistema AZX

Sportliche Optik und Steigerung der Fahrdynamik für nahezu alle Fahrzeuge!
Mit Powertech Distanzscheiben – zwischen Radnabe und Felge montiert – entsteht der Eindruck einer breiteren Felge. Das Rad füllt das Radhaus besser aus und die Fahrzeugspur wird verbreitert.

Weitere Einsatzgebiete von Powertech Distanzscheiben
Zum Ausgleich der Einpresstiefe bei anderen Felgen
Für mehr Freigängigkeit bei grösseren Bremsätteln
Zur Umrüstung von Radschrauben auf Radstehbolzen (und umgekehrt) mit dem System AZX
